

Notes

1. Cabinet is acoustically and thermally insulated, and is fabricated of continuous galvanized steel, suitable for direct application of "drywall" plaster board.
2. Supply, return risers are type M copper. assemblies include two shut off valves inside the cabinet. Standard units include high-pressure hose kits for connection of the refrigeration riser. The entire bottom of the unit is a drain pan; for containment of water within the unit.
3. Fan motors are permanent split capacitor (PSC) type.
4. See drawing 601-R-K for plan view details.
