

Notes:

1. Cabinet is acoustically and thermally insulated, and is fabricated of continuous galvanized steel, suitable for direct application of "drywall" plaster board. Supply and return risers are omitted from units.
2. Hose kits and shutoff valves are shipped loose for field piping connection of refrigeration chassis. Condensate drain is type M copper. The entire bottom of the unit is a drain pan, for containment of water within the unit.
3. Fan motors are permanent split capacitor (PSC) type.
